

eClinicalWorks

About eClinicalWorks

eClinicalWorks is an established leader in the ambulatory Electronic Medical Records (EMR) and Practice Management (PM) industry. The company's unified EMR/PM solution manages patient flow from check-in to check-out and streamlines processes regardless of practice size, specialty and number of locations. eClinicalWorks has an established customer base of more than 15,000 medical providers across all 50 states, and revenues for 2006 were approximately \$40 million. eClinicalWorks' private and investor-free corporate structure lends itself to serving customers in a timely and agile manner.

eClinicalWorks can be customized instantly and does not require months of template building or structuring that impact physician's productivity. Customers in private physician groups, community projects, hospital systems and Federally Qualified Health Clinics all rely on eClinicalWorks to manage their clinical processes. These healthcare providers are realizing the powerful benefits eClinicalWorks unified solution offers, including improved efficiency, increased revenue and decreased medical errors.

The Top 10 Reasons Why eClinicalWorks is Unique

- **Experience** eClinicalWorks has experience working with private physician groups, community projects, hospital systems and Federally Qualified Health Centers. The company has built the knowledge it takes to implement the entire solution in more than 100 sites a month.
- **Focus** Focus remains only on a unified EMR and Practice Management solution. The bulk of revenues are invested in support and development instead of sales and marketing. Every quarter new functionality is developed that has been requested by users.
- **Ease of Use** The Unified Solution is easily customizable and does not require large implementation projects or budgets. Data can be entered easily through handwriting or voice recognition. Templates can be customized and allows for maintaining a list of reusable information.
- **Customer Satisfaction** Customers are a top priority. eClinicalWorks was cited by *Medical Economics* as having the best support available. Customers are so satisfied with eClinicalWorks' Unified Solution 100% of them would recommend eClinicalWorks to others. (Information provided by KLAS 2006 Mid-Year Report).
- **Modern Technology** eClinicalWorks has been developed using modern web-based architecture of HTTP and XML. End-users can choose to deploy the system either in house or with ASP. The technology will scale and securely allow users to access the system without the need of third party systems like Citrix or a terminal server.
- **Innovation** eClinicalWorks is continuously innovating and adding functionality requested by customers. Product releases are produced on a regular basis, filled with enhancements suggested by customers.
- **Support Numerous Specialties** Today, eClinicalWorks supports over 40 specialties. The company continues to create inroads with each specialty by working to make the Unified Solution even more applicable to each market.
- **Private and Profitable** eClinicalWorks is a private company with the size to scale to match any requirement. Without worry from investors (no venture capitalists or Wall Street), the company's concentration is solely on customers. This agility will help make any project a success.
- **Cost** eClinicalWorks has consistently been recognized as a great value—offering the industry-leading solution at a high-quality of service by optimizing internal efficiency. Total cost for implementation and licenses is 50% less than the industry average. Not requiring any third party licenses reduces the total cost of ownership.
- **Ongoing Cost of Ownership** The ongoing costs of upgrades are reduced with eClinicalWorks. Auto upgrade technology is used over the internet. Upgrades occur during off hours with no down time and no human interference, thus reducing costs.
